€ 2.950.000,=
(excl. VAT)

Consultancy fee

Project description

The Traffic Control Centre for the southern part of The Netherlands is located in Geldrop. This centre processes data received from the roadside installations in the provinces of Noord-Brabant and Limburg. These installations are linked to the traffic control centre by telemetry systems. The traffic control centre is used by the Ministry of Traffic and Public Works to inform, guide and direct road users. The work consisted of: basic design, final design, development of tender documents, supervision and project management.
