Project identification

Thessaloniki Immersed Tunnel

Type of project

Immersed tunnel across the harbour in Thessaloniki

Project description

The project consists of a 3 km long road connection in the city centre of Thessaloniki. The project comprises the crossing of the harbour by a 1200 m long immersed tunnel. The road accommodates a double three lane carriage motorway including emergency lanes. The region is subjected to seismic hazard. The type of contract for the project is DBFOT. The project includes access roads, cut and covers, immersed tunnel, technical installations and toll facilities.

Scope of work

Tender Design for the immersed tunnel, including casting basin.
